

Industrie Service

Choose certainty.
Add value.

Plants and processes

Value-added in its purest form
for pharma and life sciences.

In the pharma and life sciences sector, the design and construction of production plants and machinery must satisfy the most stringent requirements. As a plant manufacturer or owner/operator, you must be particularly uncompromising in fulfilling purity criteria.

To strike a balance between quality, cost-effectiveness and safety, flawless consideration should be given to statutory regulations, investment costs and the costs of ongoing production, but also production performance, maintenance and user friendliness.

As the experts at TÜV SÜD Industrie Service, we are at your side providing support during the planning, construction and qualification of your plant. We supply solutions for all issues arising in the context of cleanrooms. Our interdisciplinary project teams support you with their expert know-how in hygienic plant design and GMP and FDA compliant production.

TÜV SÜD services

- Project studies and process consultancy
- GMP project support (RA/VMP/QMP/SOP)
- Support during construction
- Support with FAT and SAT
- Plant certification (DQ/IQ/OQ)
- Certification of GMP compliance for special machinery
- Approval testing in accordance with the building code of fire and lightning protection systems, lift systems and electrical engineering systems
- Seminars and training courses

Your benefits

- ▶ Reduced costs of planning and realisation
- ▶ Optimised certification costs
- ▶ On-time performance
- ▶ Reduced work loads for your personnel resources
- ▶ Legal certainty throughout planning and realisation
- ▶ Access to our network of experts
