Services in waste-water engineering

Safety and cost-effectiveness from planning to operation.

Within the scope of complying with statutory requirements, cost-effectiveness and safety aspects are playing an increasingly significant role in the planning, construction and operation of waste-water treatment plants. Our environmental engineering experts align your individual needs to environmental protection regulations. We supply state-of-the-art know-how in the following support services:

- Consultancy on all issues related to municipal and industrial waste-water collection, discharge and treatment including sludge treatment
- Technical support and/or emergency response services in case of malfunction or breakdown
- Survey, preparation of waste-water and indirect dischargers registers
- Production-integrated environmental protection, assessment and optimisation of production processes to comply with the state of the art
- Measurements, laboratory and semi-technical tests including interpretation, evaluation and documentation
- Integrated assessment of the drainage system, rain-water and waste-water treatment
- Development of process-engineering programmes for municipal and industrial waste-water treatment including state-of-the-art sludge treatment
- Advice and ongoing support during invitations to tender, tender evaluation and contract award
- Optimisation of waste-water treatment plants and/or process engineering, treatment capacity, plant operation and operating costs
- Functional tests and final approval, and approval of warranty performance
- Valuation of waste-water treatment plants
- Preparation of applications for the licensing of waste-water treatment plants in line with water laws
- Advice on the measures required for the internal monitoring of waste-water treatment plants, including the keeping of a logbook
- Preparation and realisation of company-specific training courses
- Preparation of arbitration reports and expert opinions within the scope of the preservation of evidence.

We will be happy to solve your issues too. Call us!
