

ELAB

Add value.
Inspire trust.

Product quality –
tested regularly
and independently

Your competence partner

TÜV SÜD ELAB GmbH is a professional provider of laboratory services. It has a long and successful history of operations in the fields of food, water and environmental analytics, and as a provider of medical laboratory services.

Third-party analysis of selected parameters conducted by TÜV SÜD ELAB GmbH at regular intervals is employed to complement product controls by manufacturers.

Consumers can scan an Internet link (QR code), printed on product labels, to access detailed data on the test plan (parameters and frequencies), including information about which products were tested.

TÜV SÜD ELAB GmbH takes samples either directly from the market or from a central warehouse, subject to availability and according to the test-plan principle of random sampling. This approach ensures the integrity of the samples, and thus the independence of the audit.

The laboratory tests focus on the product properties important for product value and quality, such as vitamins, minerals and nutrient contents, as well as on the products' microbiological status.

TÜV SÜD ELAB GmbH is a 100% subsidiary of TÜV SÜD AG, with core business skills that include fast and accurate analysis of a wide range of samples and expert knowledge.

These operations are essentially based on TÜV SÜD ELAB's accredited quality management system according to EN ISO/IEC 17025:2005 and its standardised test methods. To round off its range of services, TÜV SÜD ELAB GmbH works with accredited partner laboratories which provide analyses of specific parameters as required by TÜV SÜD ELAB GmbH.
