Testing and Approval of Amusement Parks, Rides and Structures

A Product Information Sheet by the Lifts and Machinery / Amusement Industry B.U.

The structural and mechanical integrity and operational safety of amusement rides and structures must be assessed in line with national and international regulations by means of initial approval and periodic testing. Technical tests are based on the DIN 4112 and the EN 13814 standard. In Austria, Belgium, the Netherlands and Switzerland, testing must be performed on the basis of national regulations. In the United Kingdom, the requirements of HSG 175 must be observed.

Our services

TÜV SÜD offers a comprehensive range of services for manufacturers and operators of amusement parks, rides and structures. For this purpose, we hold numerous international accreditations in the Netherlands, Belgium, the United Kingdom and Germany, to name only a few. Our experienced experts support you with state-of-the-art know-how in all issues addressing the safety and availability of your rides and facilities.

- Initial approval, acceptance testing, periodic testing and inspection of structural, mechanical condition and operational safety.
- Testing of amusement rides and structures at all locations worldwide

Your benefits

There are strong arguments in favour of cooperating with TÜV SÜD, and unique benefits to be gained.

Legal certainty and technical expertise

Our experts have longstanding international experience in the testing and approval of amusement parks, rides and structures. Thanks to our intensive participation in standardisation and safety committees and the preparation of international directives and standards, we are highly familiar with statutory requirements and the state of the art.

Benefit from our good name

As the name TÜV SÜD is widely known and enjoys an excellent reputation, you can rest assured that our reports and certificates will be widely accepted.

Don't hesitate to contact us. We will be pleased to explain the possibilities of cooperation and prepare a free quotation without any obligation on your part.

We provide worldwide services.
